

Counter top machines to produce  
and dispense frozen yogurt.

*191 "Miss Yogurt"*

# 191 Miss Yogurt

**T**he **CARPIGIANI Miss Yogurt** is a counter top frozen yogurt machine available with or without pump. It has high rate production cycles and is easy to use. It is designed for the quick production and easy serving of frozen yogurt.

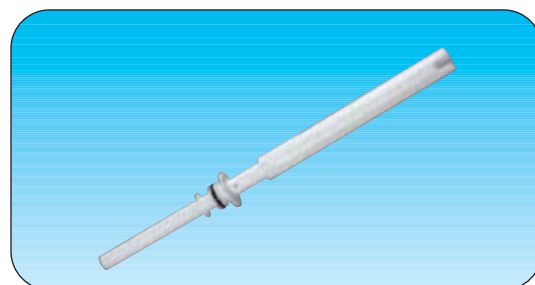

**T**he polycarbonate front panel is scratch proof and is decorated with two dessert images:

- an iced yogurt cup with fruit salad and syrup
- a dessert with creamy frozen yogurt complete with decorations.

The **Control panel** controls the following functions: machine starting, choosing the consistency/softness of the ice cream and the temperature to keep the mix, machine cleaning and switching off.

A regulating valve for gravity feeding of the cylinder and balancing of air and mix allows the **191/G Miss Yogurt** to produce a fresh and creamy iced yogurt.

The gear pump supplies the cylinder and pressurizes the mix with air. This ensures the creamy consistency of the iced yogurt and its high increase in volume.

MISS YOGURT	Hourly output of 75g portions	Tank capacity	Pump	Flavours	Electric power				Condenser	Base dimensions			Net weight kg
		Litres			Volt	Hz	Ph	kW		L	P	H	
191/G	250	18	NO	ONE	230	50/60	1	2,1	air or water	505	675-500	710	100
191/P	270	12	YES	ONE	230	50/60	1	2,1	air or water	505	675-500	710	104

Other voltages and cycles available with price supplement.  
Hourly output may vary depending on the type of mix and refers to ambient temperature 25°C and water temperature 20°C, if water condenser is installed.
